

## **Coppernic acquires Fovea, forensic investigation specialist, providing additional synergies in mobile biometric and identity markets.**

**Aix-en-Provence, France. October 9th, 2025** – Coppernic, a leader in innovative mobile biometric and identity solutions, announces its acquisition of Fovea France to expand the Coppernic Group.

“In terms of expertise and focus, Fovea provides great synergy to some of Coppernic’s existing markets,” **said Kevin Lecuivre, President of Coppernic.** “However, they also open up new opportunities and applications in adjacent markets as well.”

Fovea is the distributor in France for Regula, a global developer of identity verification (IDV) solutions and forensic devices. They also distribute other solutions from specialist suppliers such as VisionMetric, a leading provider of facial identification and composite software.

**Marc Piepers, Coppernic’s Managing Director and CTO** added the following. “The Fovea portfolio offers an interesting number of opportunities. Products such as Regula’s document readers and identity verification software are well known within our current Human Credential Management business. More and more companies are now verifying identity documents for visitors and temporary workers. Beyond that, the more specialized forensic equipment leads to completely new applications. There is a good fit and consistency in the market focus areas such as Law Enforcement, Border Control, Security Forces, KYC, and so on.”

**Ihar Kliashchou, Chief Technology Officer at Regula,** said: “We are delighted to continue our collaboration with Fovea France, now part of the Coppernic Group. With decades of expertise in forensic hardware and IDV software, Regula provides trusted technology for secure and reliable identity verification. By combining this with Coppernic’s strong market presence and technical know-how, we look forward to delivering Regula solutions to even more organizations across France.”

### **About Coppernic**

At Coppernic, we empower organizations for whom security and access control are top priorities to verify the validity of documents and identities in real time and from any location, thereby reducing the risks of fraud and unauthorized access. Our "Human Credential Management" division has been innovating for over 16 years, delivering advanced mobile solutions that ensure rapid and accurate verification while remaining incredibly user-friendly.

Our biometric and access control solutions are designed to seamlessly integrate into existing environments, enabling field operators to focus on their core tasks without worrying about technical complexity. We enhance trust and security across all setting - whether for events, public transportation, industrial sites, or government institutions - by combining technical precision with simplicity.
